# What Is the Rule?

These shapes are put in a group.

These shapes do not belong in the group.

Which of these shapes belong in the group? Circle them.

## FOCUS

Children determine the attribute the top shapes have in common, check that none of the middle shapes has it, then circle the bottom ones that share the same attribute.

## HOME CONNECTION

Invite your child to tell you what this problem is and how he or she solved it. Ask: "Can you find other shapes in our home that belong in the top group?"
